Decarbonize and Manage Demand with BC Hydro

01:00 PM - 02:30 PM PST

Description

British Columbia is witnessing unprecedented demand for electricity driven by population growth and residents and businesses looking to switch to cleaner, renewable sources of power. Join BC Hydro experts as we discuss the steps we're taking to increase electricity generation and the significant investments we're making to expand our integrated grid. Find out more about support and program offers available to communities and its large commercial and industrial businesses.

Discussion highlights include:

Site C and Call for power update

Capital plan update including new investments

Economic development support for communities

Energy efficiency plan and customizable programs available for communities

Interactive QA
