### **Leveraging VDC in Design-Build**

11:30 AM - 01:00 PM EST

Karen Wallace,  
kwallace@fldbia.org

*Building Information Modeling (BIM) is a tool or the model-based technologies that produce a building information model that enables a highly collaborative Virtual Design & Construction (VDC) process throughout a project's lifecycle. When combined, project teams can take advantage of a forward-thinking environment where the integration of people, process and technology can thrive. The whole team approach inherent in Design-Build is an ideal environment for BIM/VDC to flourish (more than any other project delivery system), especially when you can take advantage of an integrated project team from the outset, creating a platform for success, where all the client's goals can be embraced early. In addition to highlighting DBIA's approach to VDC Done Right we'll also provide real-world examples of how VDC is driving value by enabling the merging of technology and project delivery to provide optimized outcomes for Owners.*

*Presenter:*

*Brian Skripac, DBIA, CM-BIM  
Director, Virtual Design & Construction  
Design-Build Institute of America*

*There is no cost to attend, but space is limited.*

September 5, 2024

### **Northeast Chapter DBIA Clay Shoot**

**Jacksonville Clay Target Sports**

**12125 New Berlin Road**

**Jacksonville, FL 32226**

11:00 AM - 05:00 PM EST

Scott Churilla,
