October 25, 2024

### **Fall Clay Shoot**

**Jefferson Gun Club**

11:00 AM - 03:30 PM EST

*OUR CLAY SHOOT EVENT RETURNS THIS FALL*

*JOIN US ON FRIDAY, OCTOBER 25TH*

*Enjoy a day shooting sporting clays, having fun with your fellow water professionals, and raising money for our student chapter programs! We'll close the event with awards, door prizes, and lunch.*

*Space is limited, and we are expecting to sell out again this year. Register as soon as possible to secure your team's position.*

*Online registration will close on October 20.*

*Sponsorship opportunities are available as well (including custom options). Help us support the next generation of water professionals!*

*Sponsorship deadline is October 20.*

October 31, 2024

### **Coffee with Experts: Tunneling Insights**

09:00 AM - 10:00 AM EST

*Large-diameter tunneling projects allow for the construction of new pipelines beneath roads, railroads, waterways, and other challenging topography. Tunnel construction is typically capital-intensive, involves critical assets, and has an element of risk not present in traditional installations.*

*The Clean Water Professionals of Kentucky and Tennessee present a Coffee with Experts for insight on the characteristics of successful trenchless projects from the perspective of the owner, consultant, and contractor. We will explore various topics associated with tunneling to include construction technologies review, geotechnical exploration requirements, design considerations, contract document considerations that are necessary to improve constructability, mitigate risk, and other considerations as they pertain to large-diameter trenchless installations.*

November 18, 2024  
- November 22, 2024
