*The Vacuum Truck Technician training course is targeted to those that own or operate a vacuum truck which is used to clean septic tanks, aerobic treatment units, holding tanks or grease traps. It is directed specifically at owners and employees who may just be starting in business and need a good solid base of information to work with to perform their daily tasks. At the same time this one-day training provides a good refresher and overview for even experienced operators.*

*The NAWT Inspector Training class is a nationally recognized Onsite Wastewater Treatment System (OWTS) class developed to provide training, education, testing and certification for individuals conducting NAWT OWTS Inspections for property transfers, system functionality and county or homeowner association requirements. This course covers the basics of OWTS their purpose, components, and functionality, along with the NAWT Standard on how to complete an inspection for all OWTS from the basic gravity fed systems through complex systems with advanced treatment. The NAWT OWTS Inspection is an Operations Level inspection. Identifying all parts and components and assessing their condition and identify deficiencies. This is the generally accepted course that state and county health departments use for their certification requirements for individuals operating as OWTS Inspectors.*
